

End-of-year savings on our new web page

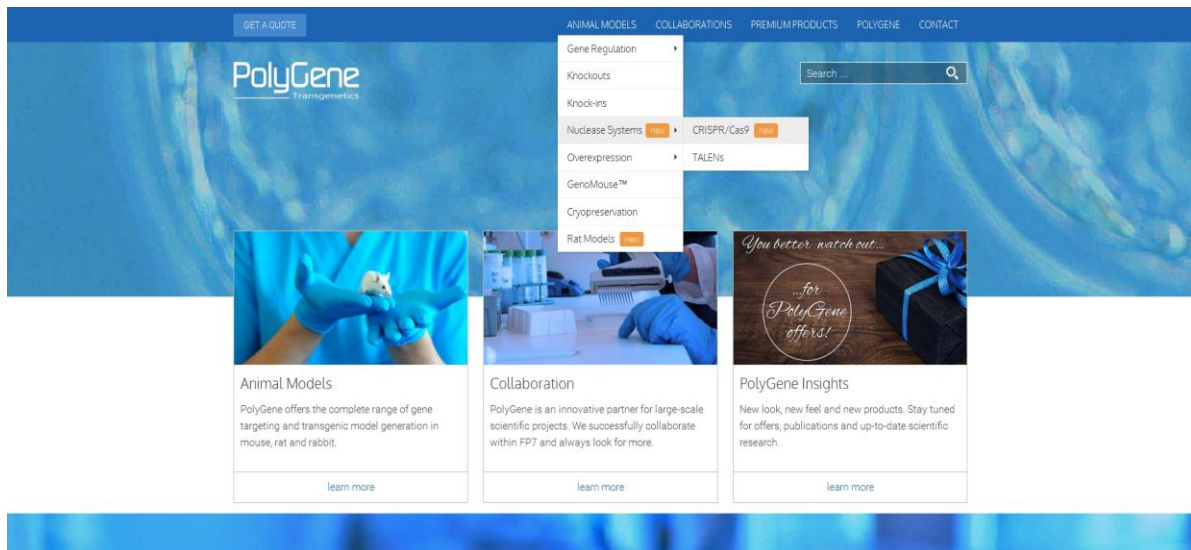

Dear Dr. Müller

We are pleased to announce our new website. From the updated look, it features a great way to sift through our portfolio of services, making it easier for you to wander and better understand our range of services.

Besides rat models and in-house tested premium products, we now offer **CRISPR/Cas9** for knockouts and knock-ins in mouse, rat or rabbit.

We added a *News* section to bring you updates and exciting information happenings in and out of PolyGene.

Even if you don't follow us on Twitter, now you find our tweets in the top right of the *News* area.

To appreciate your interest in our company, every week up to new years

even a special offer is waiting for you!

PolyGene, if you wouldn't know, is **reliability, quality** and most of all, **dedication**.

With our best autumn wishes
Your PolyGene Team
